

ClickHouse

Bring analytics into your database operations with ClickHouse on ClusterControl. Deploy it as a standalone OLAP workload or as part of a comprehensive stack — orchestrated alongside your transactional databases from a single GUI, on-prem, in the cloud or both.

Versions: 24.8, 25.3

Topologies: Single-node, Replicated with embedded Keeper

ClickHouse on ClusterControl gives you

- ✓ On-premises, cloud, and hybrid management from a single GUI
- ✓ Unified monitoring and alerting with custom dashboards.
- ✓ Automated deployment of single-node servers and replicated clusters with embedded Keeper
- ✓ Supports local and cloud full and incremental backups
- ✓ Scaling on demand — add and remove nodes
- ✓ SSL-encrypted inter-node communication

“The choice to go with ClusterControl was easy due to its user-friendly interface, reliability, and automatic failover and recovery capabilities that require no manual intervention.”

Sébastien Loos, Head of IT
Quod Financial
