

ClusterControl offers an advanced, environment-agnostic automation platform for your MariaDB clusters and their functionalities. Deploy your first cluster on-premises or in the cloud today!

Version 10.4, 10.5, 10.6, 10.11, 11.4, 11.8

MariaDB on ClusterControl gives you

- ✓ Easy deployment of MariaDB Server or MariaDB Galera with MaxScale load balancers
- ✓ Bespoke functionalities like Spider, ColumnStore, MyRocks and OQGRAPH
- ✓ Cluster to cluster replication, e.g. across data centers, with MariaDB Galera cluster
- ✓ Configuration files management with dynamic system parameter updates
- ✓ Local and cloud backups with features like compression, encryption, PITR, etc.
- ✓ Consolidated, real-time performance monitoring and query analysis

WESTPAY

“ClusterControl provides the means for ensuring the highest possible uptime as well as running best possible performance at all times.”

Thomas Nilsson, CTO, Westpay
