

Ensure uptime for all of your MySQL instances by automating your on-premises, cloud, and hybrid deployments with ClusterControl.

Versions: 5.7, 8.0, 8.4

Distributions: Community, Oracle, Percona Server & Percona Pro

MySQL on ClusterControl gives you

- ✓ A full-ops automation platform for MySQL open-source and enterprise binaries
- ✓ Encrypted, verifiable full, incremental and partial backups on-prem or in the cloud
- ✓ RBAC and LDAP and audit logging to track user authentications and activities
- ✓ Full-stack observability into the host and database, even down to the query-level
- ✓ Automated cluster ops like stop, reset, rebuild, change primary, and promote replica
- ✓ On-prem, cloud, and hybrid single, primary-replica or multi-primary cluster deployments

aptos

“ClusterControl ticked all of the boxes and then some and it became very clear, very quickly that their level of expertise was second-to-none. It has given us a lot of confidence in our architecture while reducing cost and providing a sense of security.”

Dominic Day, Head of Managed Hosting, Aptos Solutions UK
